

Our refurbished chassis are just like new.

Providing Motor Carriers with the equipment they need to get the job done is important to us. That's why we're investing millions in our chassis refurb program. Our team meticulously inspects each chassis and upgrades them with the following components:

- New electrical receptacle
- New glad hands
- New air lines
- New brake hoses
- New electrical harness
- New slack adjusters

- New spring brakes
- New wheel clamps, studs, and nuts
- New emergency valve
- New camshaft bushings
- New inner and outer bearings and races
- New drums

With a refurbished chassis from DCLI, you'll get the lower maintenance costs associated with a new piece of equipment without paying new equipment prices.
