

53' DOMESTIC CHASSIS OVERVIEW

It is more important now than ever for domestic shippers to efficiently move cargo. Whether you're looking to kick off a transition from trailers to containers or need more flexibility moving containers from the rail to customers and distribution centers, our 53-foot domestic chassis can support the intermodal demands of your business.

53-FOOT DOMESTIC CHASSIS

Quality is of the utmost importance to you, so it's important to us. We have spent \$1 billion over the past two years on tens of thousands of new units and upgrading our existing fleet with radial tires, hardwired LED lights, and more. These upgrades mean more up time for our chassis and increased dependability for truckers.

We have more than 125,000 53-foot domestic chassis available through our Direct ChassisLink Leasing program (DCLL) or for daily use at 100+ start/stop locations across our nationwide Direct ChassisLink Domestic Pool network (DCL53).
